THE HULK

A SUCCESSFUL USER INTERACTION

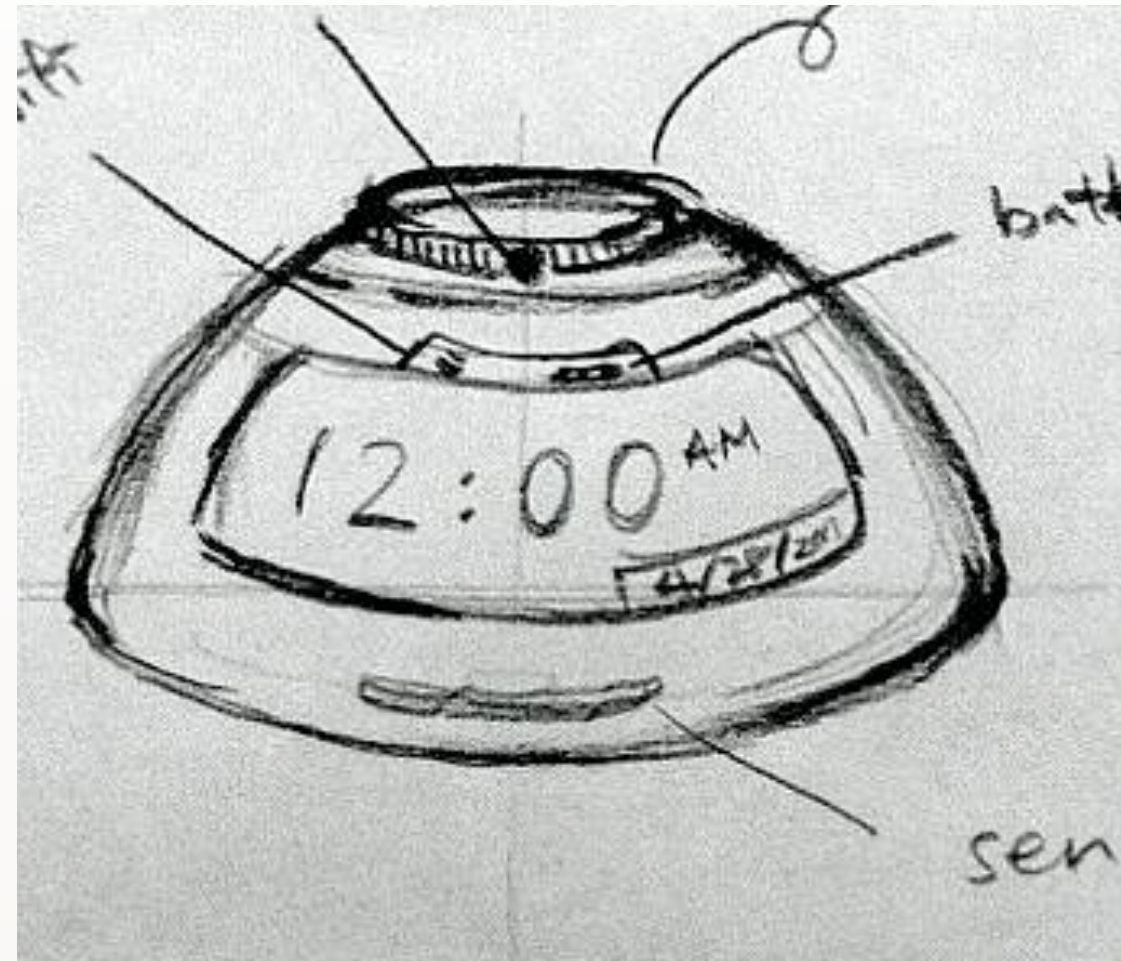

After a long day of work, Janet is finally heading home at 9 PM. She finds a parking spot on the street near her apartment. She takes her purse but forgets to take her motocross gear. She locks her car with a built-in alarm system and walks toward her home.

It's 9:30 PM and she's cooking dinner. Her phone suddenly rings. Janet looks at her phone. It's The Hulk's alarm notifying her that someone has broken into her car. She opens The Hulk app and a series of images show a thief taking her motocross gear. Janet instantly presses the 911 button and talks to the police about the incident.
